Prof. Dr. Nelio Alves

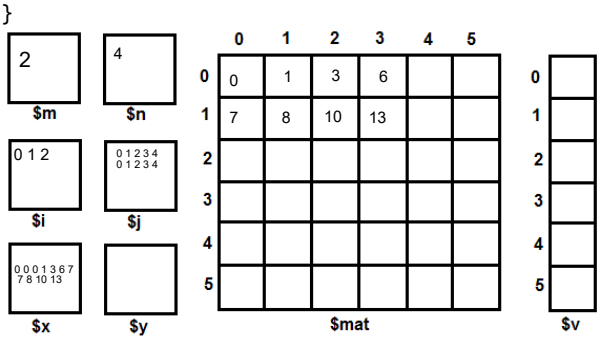

Seção: Matrizes
Exercícios: testes de mesa com matrizes

Execute manualmente os testes de mesa a seguir, preenchendo o comportamento das variáveis (se alguma variável não for usada no teste de mesa, apenas ignore-a).

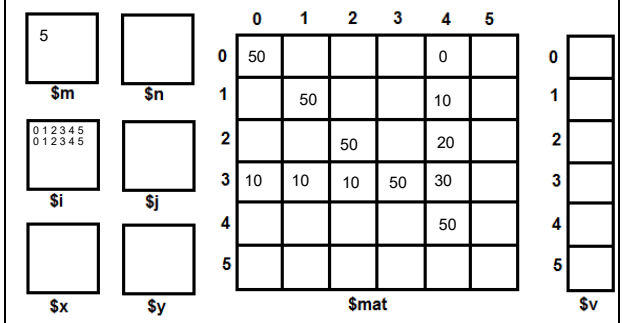

```
n = 3;
for (i=0; i<n; i++) {
        for (j=0; j<n; j++) {
                mat[i][j] = 1 + i + j;
        }
}
```

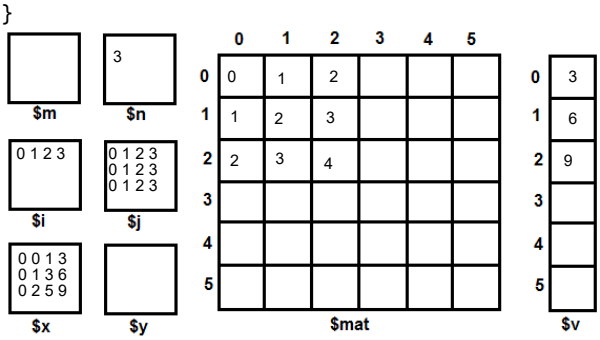

```
m = 2;
n = 4;
x = 0;
for (i=0; i<m; i++) {
        x = x + i;
        for (j=0; j<n; j++) {
                x = x + j;
                mat[i][j] = x;
        }
}
```

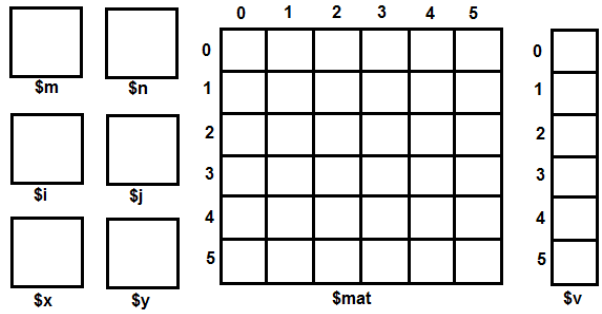

```
m = 5;
for (i=0; i<m; i++) {
        mat[3][i] = 10;
}
for (i=0; i<m; i++) {
        mat[i][4] = 10 * i;
        mat[i][i] = 50;
}
```

```
n = 3;
for (i=0; i<n; i++) {
        x = 0;
        for (j=0; j<n; j++) {
                mat[i][j] = i + j;
                x = x + mat[i][j];
        }
        v[i] = x;
}
```

```
m = 5;
for (i=0; i<m; i++) {
        v[i] = 10 - i;
}
for (i=0; i<m; i++) {
        mat[i][i] = v[i] / 10;
}
```

```
n = 4;
for (i=0; i<n; i++) {
        for (j=0; j<i; j++) {
                mat[i][j] = (i + 1) * 10;
        }
}
```
